

The Dangerous Cutting Master uses 6 pin XLR connectors on its rear panel to double up the channel count. This breakout cable is about 1 foot long. The left and right channels of each Y cable are marked, in this case with colored boots. The connectors are by Neutrik and the cable by Mogami. Other brands can be used if they are of comparable quality. The pin outs are below.

Pin #	6 pin side	Function	Pin #	3 pin side		
1	NC6MX	Left sh	1	NC3FX, Female XLR		
2	Male XLR	Left hi	2			
3		Left lo	3
